## Why purchase a mobile stockpiling conveyor?

Using a mobile conveyor to stockpile material has many benefits:

- Reduced operating costs (fuel and labor) as the loader operator does not need to be continuously moving material from under the conveyor (sometimes the need for a second loader is totally removed)
- Greater operating efficiency - less re-handling of product and more focus on feeding the processing plant and loading trucks
- Natural stockpile capacity increased
- No contamination of product - often caused through re-handling
- More environmentally friendly than a loader
- Easy to move around work site

## Products include:

- TR40 - 40ft (12m) track driven conveyor
- TR50 - 50ft (15m) track driven conveyor
- TR60 - 60ft (18m) track driven conveyor
- TR75 - 75ft (22m) track driven conveyor
- TR95 - 95ft (28m) track driven conveyor

Standard belt widths available from 26" up to 42" depending on conveyor type.

Tracked range conveyor comes hydraulically driven and hydraulically raises and lowers.

Tracked range includes crawler tracks complete with remote control pendant.

## Options on the tracked conveyors include:

- Hydraulic Folding Head Section (Std on 60, 75, & 95ft)
- Optional Deutz or Cat Engine
- Heavy Duty Belt (Std on the 75 & 95ft)
- Chevron Belt
- Scraper Upgrade
- Direct Feed Grid
- Enclosed Skirting
- Radio Controlled Pendant
- Impact Bed

The range is developing all the time, and innovative and dynamic additions and options to this range are planned for the near future.

## Why choose an Anaconda conveyor?

There are many reasons why more companies are buying mobile conveyors from Anaconda Conveyors USA:

- Exceptional build quality - robust and reliable with features designed with the end user in mind
- Excellent value for money - typical payback period of less than 6 months!
- Competitively priced against all other conveyor manufacturers
- Quick set up time on all products
- Extensive range offering conveyors capable of handling up to 880 tons per hour
- Dedicated customer support

## Products include:

- ST40 - 40ft (12m) radial wheeled conveyor
- ST50 - 50ft (15m) radial wheeled conveyor
- ST60 - 60ft (18m) radial wheeled conveyor
- ST80 - 80ft (24m) radial wheeled latticed framed conveyor
- ST100 - 100ft (30m) radial wheeled latticed framed conveyor

Standard belt widths available from 26" up to 42" depending on conveyor type.

Standard range conveyor comes hydraulically driven and hydraulically raises and lowers.

Conveyors are available as hydraulic coupling, electric or diesel self powered.

## Options on the wheeled conveyors include:

- Electrical Drive
- Diesel Engine Powerunit
- Heavy Duty Belt
- Chevron Belt
- Scraper Upgrade
- Direct Feed Grid
- Enclosed Skirting
- Impact Bed

Anaconda Conveyors USA is a leading manufacturer and distributor of mobile conveyor equipment for the materials handling industry. Our equipment is designed and built to the highest standards to meet the most challenging conditions in mining, quarrying, sand and gravel, topsoil, compost, recycling and woodchip industries. All products are manufactured to North American performance and safety standards.

Anaconda Conveyors has a very simple philosophy - design, manufacture, deliver and support a range of products that add value to our customer's business. The features you will find on our products have been designed to improve the performance and durability of the product.

The volume of conveyors built each year means we procure the best components at the most competitive prices - an advantage we pass on to our customers through lower conveyor prices!
